EdgeCAT 2025

Core concepts

The bed-rock of our entire course

- PHASE-1** • At this stage, student will take tests on **Core concepts**
- **Master 3 important skills:** Concept Clarity Question Choice and Speed
- Students **AI driven** Performance **report** card will be generated, with Analysis of based **50+ indicators**

Deep dive

The lead you need

- PHASE-2** • **Ramp up** the concepts and fine tune your prep
- **Strategy correction** based on AI report card and video discussions
- Important **value addition material**, tasksheets, eliminaiton techniques by faculties

Cruise control

Tame the CAT skillfully

- PHASE-3** • Feel the exhilarating effects of an adrenalin rush before the exam, or what is commonly called the **fight-or-flight** response.
- **CAT** always experiments with patterns. Here the preCATs **simulate a number of variations** the CAT 2023 could comp up with.

ON THREE PHASED TESTING/LEARNING APPROACH

Who this course is for

Those who are looking for "**Learning test series**".

Who need a **sense of having completed** a topic and having **practiced enough**.

Anyone looking to improve their **score** and identify their true **potential**.

Students looking to **improve** in specific topics and subtopics, as the **adaptive** element works at the micro level.

Those who want to interact with an **inspiring faculty** that employs **innovative** ways of teaching rather than **routine text** solutions.

Who this course isn't for

Those who are looking for "**Testing test series**".

Those who believe that "**tough is equivalent to good**". A great many of the questions seen in these mock exams are way tougher than what one will ever see in CAT.

Students not serious about doing well in **CAT**. Since it is very **comprehensive program** with over 145 tests.

For the adaptive engine to work, a student has to be **honest about their performance**. If one is trying to cheat their way to mock scores only flaunt. Then this may be waste of time.

How is our Course different from that of others

This is the **only truly adaptive** test series in the country.

Each topic test and sectional test is based on the students performance in the previous test. This gives a clear **understanding of strengths, weaknesses and revision areas**. This is unique, as in other test series, either there is 1. no adaptive element or it is only at a specific question level.

Multiple unique methods like **elimination techniques**, question 2. Level attempt analysis crossing out options etc help students really maximise their score

Video discussions and **mentor feedback** : Reorient your strategy with **3 times CAT 100%ier**

"Don't practice until you get it right. Practice until you can't get it wrong"

This saying goes apt for current LRDI section of CAT. In the recent years, LRDI has deeply carved itself into the CAT paper. This section is grabbing a lot of attention and your attention but no act. To tackle this, LRDI Shortcuts videos has been designed, meant to equip you with the LRDI armor.
